

## Graduate Framework

### Completion requirements

#### Graduate Framework mapped to assessment

The graduate framework is embedded in your learning and assessment activities. The table below shows you which domain you are working towards in the assessment tasks

#### 1. Professional Approach

*Reflective, self-aware team members with excellent communication skills approach new challenges with flexibility and confidence.*

#### **This assignment helps you to demonstrate a professional approach by:**

Showing excellent communication and advisor skills through the written word and being practice-led.

#### **Your submitted piece of work would demonstrate this well if it:**

Shows clear thinking through the presentation of an analytical, coherent, and well-structured report to promote trust in yourself and the profession.

---

#### 2. Sustainable Mindset

*Commitment to environmental sustainability and regeneration, demonstrating an understanding of complexity and systems thinking.*

#### **This assignment helps you to demonstrate a sustainable mindset by:**

Your understanding of the policy and legislation that applies to planning and sustainable development.

#### **Your submitted piece of work would demonstrate this well if it:**

Shows an environmental awareness and application of the requirements within the planning system to enable successful sustainable development.

---

#### 3. Technically Skilled

*Enter the workplace as technically and digitally skilled practitioners who value practical knowledge and scientific evidence.*

**This assignment helps you demonstrate technical skills by:**

To demonstrate your relevant, professional, academic and practical skills, including the provision of evidence in the preparation of the report.

**Your submitted piece of work would demonstrate this well if it:**

Shows competence in the evidence provided and the use of subject specific technical language and procedures.

---

**4. Innovative Thinker**

*Have commercial acumen and curiosity, seeking innovative solutions to real-world problems.*

**This assignment helps you to demonstrate innovative thinking by:**

To show curiosity in the planning system and seek innovative solutions within the planning/development process.

**Your submitted piece of work would demonstrate this well if it:**

Shows professional curiosity, creativity and a positive work ethic in its approach to solve the issues surrounding planning using available evidence and research.
