- Problem Statement & Theoretical Framework
- The Research Questions
- Limitations and Delimitations
- Literature Review
- Methodology
- Data Collection
- Data Analysis
- Findings
- Other Considerations
- Conclusions and Recommendations
- Closing Comments

Problem Statement:

[Be prepared to explain the background leading to the problem]

Theoretical Framework:

[Describe the theoretical framework for the study]

Describe how the study's Limitations and Delimitations affected the scope of the study and the potential use of the study's findings.

<u>The primary research question was</u>:

[Describe how the primary research question aligned with the problem statement]

<u>The secondary research questions were</u>:

[Describe how the secondary research questions supported the primary research question]

Topic #1

- Key points from the literature that supported your analysis

Topic #2

- Insert duplicate slides as necessary to cover all literature review topic areas

- Type of study (Qual, Quant, Historical, Simulation, Mixed)
- Research method/approach
- Key steps/requirements for the approach
- Type of analysis

Insert Graphic of Research Design

The Author's Logic Map of the Research Methodology

Describe data samples and how data was collected

Insert graphic if appropriate to depict the data sets and sampling process

- Describe the analysis for each hypothesis or secondary research question

Secondary Research Question 1

Describe how the analysis answered the research question

Secondary Research Question 2

Describe how the analysis answered the research question

Add duplicate slides for additional secondary research questions

Primary Research Question

Describe how the analysis answered the research question

[Describe issues or considerations that affect interpreting the data. Examples might be outliers or contradictions in the data; limitations in sampling; and potential bias by the researcher, sources, or data. Show your objectivity and critical thinking in the study.]

Conclusions:

[What did the study indicate in the end?]

Recommendations:

[What did the study indicate as recommendations to decision makers?]

[What are potential areas of future study based on your study?]
